

RoadRunner™

Digital Surveillance Systems for Government and Military Vehicles

The RoadRunner Digital Video Recorder delivers the highest quality video and audio recording and is backed by an industry-leading 3-year warranty. Designed and manufactured specifically for use in mobile applications, the RoadRunner system will deliver years of high quality video recording at the lowest cost of ownership. Featuring user-friendly, license-free software the system is intuitive, easy to use and designed to provide the video that you need, when you need it.

Industry Leading Performance

Performing with little to no maintenance for years longer than other systems, the RoadRunner system is easier to maintain and more affordable. The system can be easily upgraded and expanded offering maximum value for growing applications. Utilizing MPEG-4 compression, the RoadRunner system provides months of on-board storage, maintenance-free operations and system wide remote updates.

Secure Video Clips

Video clips feature optional password protection, watermarking and 128-bit encryption to ensure video is authentic and secure. System settings are secured with password protected access-rights for up to 64 groups and 256 users. Removable hard disk drives provides secure portable evidence.

Rugged Steel Construction

The steel constructed digital video recorder is Mil-Spec and SAE rated for proven durability and reliability in harsh mobile environments. Including license-free software, unlimited updates and a 3-year warranty, the RoadRunner system provides superior quality in an easy to use system that provides years of reliable service.

Easy System Management

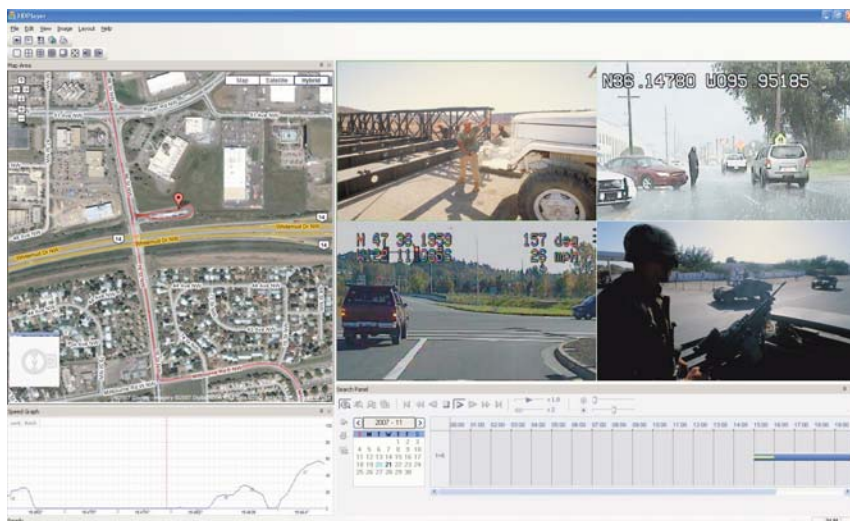

License free and included software allows for easy fleet-wide system updates. The optional GPS includes the **iSM™ (Interactive Speed and Mapping) Interface** featuring historical mapping and speed graphs. By selecting a location on the map or a desired speed, video from that location or speed is instantly provided. With automatic health-system checks and email notification for events, hard drive status and failures, the RoadRunner system provides easy system management.

Simultaneous Recording

The system is configured to automatically begin recording, eliminating user error and continues to record even during playback, archiving and performing administration functions.

Longest Recording Durations

The RoadRunner™ system records months of high quality video with storage up to 750Gb and provides quick and easy search functions with several easy options for archiving secure video clips.

RASplus™ and HDPlayer™ Software

License-Free, included at no additional charge • Remote viewing from virtually any location • View multiple vehicles and sites simultaneously, up to 64 cameras from up to 16 different sites • Fleet-wide updates, programming and time synchronization • Automatic health report status and emailed notification for events, system failures, hard drive status and camera obstructions • Call-back feature provides live images to a central location • Simultaneously transmit live and playback video from hundreds of video sources to multiple users • Easy search tools provide instant

access to recorded data; search by event or time and date • Utilize the GPS option for searching by location or speed; The new iSM™ (Interactive Speed and Mapping) Interface features historical location and speed data providing intuitive vehicle tracking information • Create secure tamper-proof video clips with optional password protection to restrict viewing access

MR4 Series

Records up to 4 Cameras + Audio Recording

MR8 Series

Records up to 8 Cameras + Audio Recording

Camera Options and Accessories:

- RR-CIR1**
- Color Interior Camera
 - Built-in Microphone
 - IR Illuminators
 - Standard or High Resolution
 - 2.5mm, 3.6mm or 8.0mm lens

- RR-CT**
- Color Interior/Exterior Camera
 - Vandal-Resistant
 - 4-8mm Varifocal Lens
 - Standard or High Resolution
 - Rugged Tear Drop Shape Housing

- RR-CVIR**
- Color Interior Camera
 - Vandal Resistant
 - Built-in Microphone
 - IR Illuminators

- RR-CD**
- Color Interior/Exterior Camera
 - Vandal-Resistant
 - 4-8mm Varifocal Lens
 - Standard or High Resolution
 - Rugged Dome Housing

- RR-HDP**
- Hard Disk Player / Adapter

- RR-GPS**
- GPS Antenna for iSM (Interactive Speed & Mapping) Interface

- RR-DCPLCD**
- LCD Display and Control Panel (includes floor mounts)

- RR-WT200, WR200**
- Wireless LAN High Powered Transmitter, Receiver

- RR-ENV, RR-ENVH**
- Environmental Protective Enclosure, with Heater

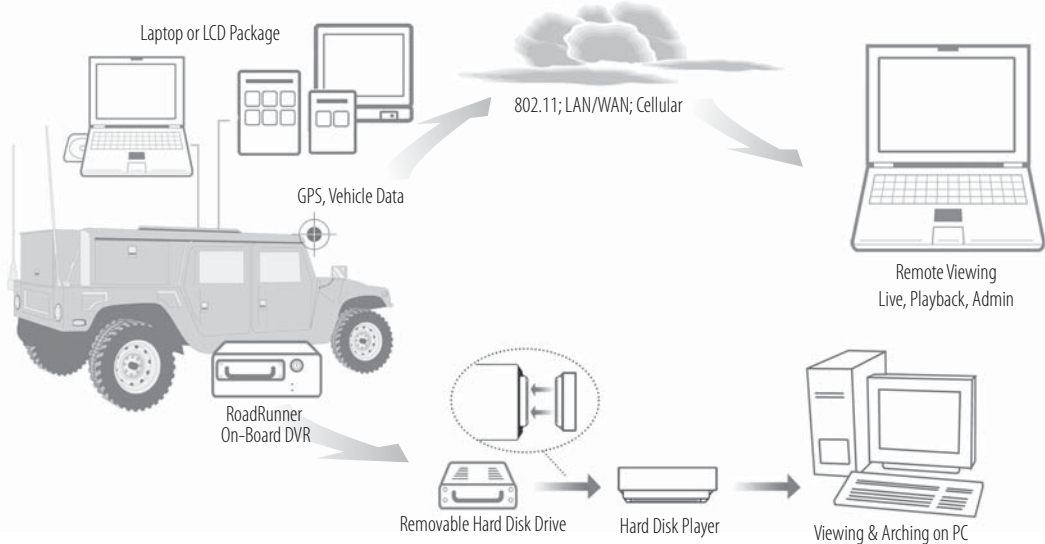

- RR-MR160HD, 250HD, 500HD, 750HD**
- Extra Removable Hard Disk Drive (160Gb, 250Gb, 500Gb, 750Gb)

Recording Duration Chart:

System-Wide Recording Rate	HDD Size: (160Gb is Standard and Included)			
	750Gb HDD	500Gb HDD	250Gb HDD	160Gb HDD
30 images per second:	2,257 hours	1,503 hours	750 hours	474 hours
60 images per second:	1,128 hours	751 hours	375 hours	236 hours
90 images per second:	752 hours	501 hours	250 hours	158 hours
120 images per second:	564 hours	375 hours	187 hours	118 hours

Recording durations are based on standard quality. For complete recording duration estimates, please utilize the HDD Calculator tool: www.avt-usa.com
