

RoadRunner™

Video Surveillance Systems for Public Transit and Rail Applications

Apollo Video's RoadRunner™ system is designed specifically for use in mass transit and rail applications. The steel constructed digital video recorder is Mil-Spec and SAE rated for proven durability and reliability in harsh mobile environments. Including license-free software and a 3-Year DVR warranty, the RoadRunner™ system provides superior video quality in an easy-to-use system for years of reliable service and the lowest cost of ownership.

Highest Reliability, Lowest Cost of Ownership

Performing with little to no maintenance for years longer than other systems, the RoadRunner™ system is easier to maintain and more affordable. Utilizing MPEG-4 compression, the system provides months of on-board storage and is optimized for user convenience featuring maintenance-free operations and system-wide remote updates. The system can be easily upgraded and expanded offering maximum value for growing applications.

Industry Leading Performance

Record up to eight (8) cameras simultaneously for full video and audio surveillance of all types of transit and rail vehicles. Utilizing the most advanced compression methods to record up to 120 images per second, the RoadRunner™ system delivers industry-leading recording speed, longer recording durations and exceptional video quality. Visit www.avt-usa.com to view actual video clips recorded from the RoadRunner™ system.

Advanced Networking Capabilities

Included and license-free software provides fleet-wide time synchronization, automated system health status checks, and email notification of system failures, camera obstructions and hard disk drive status. The system's call-back feature provides live video to a central station in an emergency.

Secure Video Evidence

Video clips are watermarked and encrypted to ensure video is authentic and feature optional password protection to restrict viewing access. Software functions are password protected with access rights for up to 64 groups and 256 users.

iSM™ (Interactive Speed & Mapping) Interface

The GPS option provides a map display of historical route location data and graphs of vehicle speed. By selecting a location on the map or a desired speed, synchronized video playback from that location or speed is instantly provided. The iSM™ Interface provides an easy method for the investigation of speed complaints, provides street names and geographical data for route information, passenger pick-up and drop-off locations as well as easy confirmation of ADA compliance.

Integrated System Management Software

The license-free Remote Administration Software (RASplus) is included at no additional charge. RASplus provides easy system management and wireless access to first responders, law enforcement and/or transit personnel. With the ability to view up to 64 cameras from up to 16 different vehicles / sites, RASplus provides system-wide, easy to use access and management for entire fleets and facilities.

RoadRunner™

Video Surveillance Systems for Public Transit and Rail Applications

- License-free, included at no additional charge
- Provides remote viewing of multiple vehicles and sites simultaneously from virtually any location
- Perform fleet-wide system updates, programming and time synchronization
- Receive automatic health report status and email notification for events, failures, hard drive status, camera obstructions, etc.
- Call-back feature provides live images to a central location in the event of an emergency
- Simultaneously transmit live and playback video from hundreds of video sources to multiple users
- Easy search tools provide instant access to recorded data searching by event or time and date; Add the optional GPS for searching by location or speed, the iSM™ (Interactive Speed and Mapping) Interface features historical location and speed data providing intuitive vehicle tracking information
- System settings are secure with password protected access-rights for up to 256 users
- Create secure tamper-proof video clips with optional password protection to restrict viewing access

RASplus™ and HDPlayer™ Software

The RoadRunner™ system includes several camera options designed for maximum video coverage in all light levels. Options include built-in microphones, exterior and vandal-proof housings and more. Visit our website for a complete listing of cameras, wireless, GPS and other options and accessories: www.avt-usa.com

MR8 Series
Records up to 8 Cameras + Audio Recording

MR4 Series
Records up to 4 Cameras + Audio Recording

3 Year
DVR Warranty

Recording Duration Chart

Hard Disk Drive:	Recording 30 ips	Recording 120 ips
1.5TB HDD	4,517 hours	1,129 hours
1.0TB HDD	3,010 hours	752 hours
750GB HDD	2,257 hours	564 hours
500GB HDD	1,503 hours	375 hours
250GB HDD	750 hours	187 hours

ips = images per second

Recording durations are based on standard quality. For complete recording duration estimates, please utilize the HDD Calculator tool: www.avt-usa.com
